Our Products and Services

AUSTRA ENERGY | COMPANY PROFILE

2022 COMPANY PROFILE

OUR VISION

Making Sustainable Living a Reality

OUR MISSION

To work only with industry's experts in delivering the best available products while providing outstanding customer service at all times

WHO WE ARE

Founded by a group of renewable energy professionals and enthusiasts, Austra Energy is your reliable supplier of renewable energy products and services across Australia. With its head office in New South Wales and distribution centres across the country, Austra Energy works closely with the industry's expert manufacturers in bringing you high quality solar products alongside technical expertise and outstanding customer service.

At Austra Energy, we are proud to be working with the best renewable energy professionals in developing energy projects of all scales across Australia, thus contributing towards the Renewable Energy Target set by the Australian Government while providing a green future for generations to come.

TESTIMONIALS

'The team at Austra Energy is professional and have always gone above and beyond to offer the best customer service from start to finish. It's great to know that you are not just a price tag.'

Paul, Installer VIC

'Austra supplies a mix portfolio of solar brands and don't shy away from offering advice when needed. They genuinely care more about our relationship than making a quick buck.'

James, Retail Manager NSW

PV PANELS

We supply various types and designs of solar photovoltaic (PV) panels, from high quality Tier-1 manufacturers only.

Our supplied panel technology ranges from high-efficiency mono-crystalline panels to high-temperature-tolerance poly-crystalline panels.

ENERGY STORAGE

Lithium-ion Energy storage is a relatively new product in the renewable energy industry. With increasing numbers of new and competitive brands entering this market each year, we select our partners with utmost stringency.

INVERTERS

PV Inverter is the backbone of any solar PV system, Similar to PV panels, inverters also come in various designs that are suitable in specific applications only.

For each application, we only supply products from the best manufacturers in their niche.

MONITORING TECHNOLOGY

Nowadays information and technology is rapidly-growing and it is imperative for us to take back control of our energy system.

We supply the latest Monitoring switches and intelligent software that enable end-users to optimize their electrical usage in real-time, as well as maximizing the benefits of their Solar PV and Energy Storage systems.
