PROFESSIONAL SOLAR MOUNTING SYSTEMS

START

JIANG YIN AO YIN ENERGY CO.,LTD

ABOUT VOSLAR

Voslar devotes our expertise and resources into the research, design, manufacturing and distribution of quality PV mounting system solutions. Our products have been installed in Europe,Australia,Asia,Middle East,America,China,and so on,since it established.

OUR CULTIVATE PROFESSIONALISM

Voslar cultivates professionalism and Innovation on product research and development to provide high quality standard assurance to customers with our professionalism, and create more value with our innovation.

OUR MANAGEMENT

Voslar is a multinational organisation formed by highly experienced professionals within the solar photovoltaic manufacturing and installation industry.We apply stringent international manufacturing and management standards including but not limited to ISO9001: 2012, FMEA, MSA.International quality manage systems in all phases of R&D,manufacturing,marketing and after-sales-service.

OUR SERVICE NETWORKS

With our reliable products and short response time in our customer services,Voslar won trust from solar system integrators,installers and distributors world wide.Since our establishment,we have formed alliance with distribution partners world wide,and developed a highly professional sales and customer service team to offer our customer a global and efficient service network.

Introduction

VS Pitched Roof Racking System is designed with great flexibility for both commercial and residential roof solar system. It is suitable for installing framed and frameless modules fixed to pitched roofs. VS product series have the innovated design of VS Rail and D module to make the installation easier and faster. Our highly customizable pre-assembled solutions can significantly reduce your installation time and cost.

Tile Roof System

Benefits

Easy Installation

D-module can be installed onto our VS Rail from any position. Systems can be pre-assembled at our factory to save your installtime on-site.

Flexibility and Compatible

VS Rail and its accessories can be installed with most type of solar panels under different conditions.

Safety and Reliability

The racking systems can withstand various weather conditions and are complied with the A1S/NZS 170 and other international structure load standards. The main support components have also been tested to guarantee its structural stability and weight and wind load capacities.

Technical Information

Install Site	Pitched Roof
Tilt Angle	Flushed with the roof, up to 60deg
Building Height	up to 20m
Max Wind Speed	up to 60m/s
Snow Load	up to 1.4KN/m²
Standards	AS/NZS 1170 & DIN 1055 & Other
Material	Aluminum alloy & Stainless Steel
Color	Natural
Anti-corrosive	Anodized
Warranty	10 years warranty
Duration	More than 20 years

Introduction

VS Flat Roof Racking system is developed to mount solar module in a certain tilt angle on a flat roof or ground. You can have the fixed or adjustable angle solution of 10-15deg, 15-30deg and 30-60deg according to your project requirement.VS series product have the innovative aluminum rail,D-module,clamps and legs which can be pre-assembled to make the installation easy and quick for significant savings of labor cost.Besides,the customized length of rail will not require onsite welding and cutting to maintain the appearance entirety, structural strength and ensure anti-corrosive performance.

BALLASTED MOUNTING SYSTEM

Introduction

VS Ballasted Mounting System is a highly engineered solution that secures the array without damaging the flat roof. It is compatible with the usual framed modules and typically does not require roof penetration. Made of light weight and strong aluminum construction, the VS ballasted solution components are pre-assembled and trimmed to prevent corrosion and save your installation time and labor cost.

Benefits

- Easy Installation
- D-module can be installed onto our VS Rail from any position. Systems can be pre-assembled at our factory to save your installtime on-site.
- Flexibility and Compatible
- VS Rail and its accessories can be installed with most type of solar panels under different conditions.

Safety and Reliability

The racking systems can withstand various weather conditions and are complied with the A1S/NZS 170 and other international structure load standards. The main support components have also been tested to guarantee its structural stability and weight and wind load capacities.

AL-GROUND MOUNTING SYSTEM

Introduction

VS AL-Ground Mounting System is made of 100% aluminum for mounting on concrete strip foundations or ground screws. It is featured with light weight, strong structure, and recyclable material. With VS AL-Ground Mounting System, Beam, legs and rails are manufactured and pre-assembled in the factory avoid welding and cutting onsite to save installation cost. Our mission is to simplify your installation and ensure the structure safety.

Benefits

- Easy Installation
- Parts have been pre-assembled at factory to save your installation time.
- Safety and Reliability
- The structure is designed and tested strictly against the extreme weather simulations.
- Flexibility and Adjustable
- Smart design reduces the difficulty of the installation on most condition.
- 10 Years Warranty
- Titanergy provides a 10-years warranty for the material and structure.

Technical Information

Install Site	Open Field
Max Wind Speed	up to 60m/s
Snow Load	up to 1.4KN/m²
Module Type	Framed or Frameless
Module Orientation	Portrait
Main Material	Anodized Aluminum
Fasten Material	Stainless Steel
Foundation	Concrete With Pre-Buried Bolts Ground Screw

Introduction

VS C-Steel Mounting System is applicable for solar photovoltaic systems on open fields.The steadiness and safety of this system is compilable with the international structural mechanics and construction standards.The system can be modified to suit different foundation solutions,such as concrete with pre-buried bolt,direct buried and ground screws.Material used include hot galvanized steel and anodized aluminum alloy,with anti-corrosive coating suitable for outdoor application.As per practical requirements,the system is able to be planned and customized at the factory to avoid welding and cutting onsite.

Ground Screw Foundation

Benefits

Easy Installation

Engineered and assembled at the factory to save your time and cost.

Steady and Safety

Our systems are designed in accordance to the international structural mechanics and construction standards.

Excellent Duration

All raw materials are coated with high quality anti-corrosion protection.

Great Flexibility

With our mounting system,ground mount solar arrays can be planned on a per kilowatt or magawatt cluster basis.

PILE-GROUND MOUNTING SYSTEM

Introduction

VS Pile Ground System is designed for large scale commercial and utility PV systems on non-soil ground, suitable for both framed and frameless module installation. Open Post can be pile into the ground 1-2 meters by piling machine quickly, then Al-Beam structure and B-Rail with clamps can be easily mounted onto the system. Our mission is to simplify your installation and ensure the structure safety.

Benefits

- Easy Installation**
Parts have been pre-assembled at factory to save your installation time.
- Safety and Reliability**
The structure is designed and tested strictly against the extreme weather simulations.
- Flexibility and Adjustable**
Smart design reduces the difficulty of the installation in most conditions.
- 10 Years Warranty**
Voslar provides a 10-years warranty for the material and structure.

Technical Information

Install Site	Open Field
Max Wind Speed	up to 60m/s
Snow Load	up to 1.4KN/m²
Module Type	Framed or Frameless
Module Orientation	Portrait
Rail Material	Anodized Aluminum
Post Material	Hot-dip Galvanized Steel
Adjustability	Post Height Deviation: 10mm
	Post Angle Deviation: 2°
	Post Verticality Deviation: 2°
	Pile Driving Depth: 1000~2000mm
Soil Condition	Non-Sandy

POLE MOUNTING SYSTEM

Introduction

VS Pole Mount System is designed to install solar panels on a single pole. According to different conditions, several kinds of solutions are available. VS Pole Mount System takes the importance of safety and duration. The systems have been engineered and tested to comply with the structural mechanics standards. Material used include hot galvanized steel and anodized aluminum alloy, with high quality anti-corrosive coating suitable for outdoor applications.

Benefits

- Easy Installation**
Integrated Design with the support pole to minimize time and cost of installation.
- Steady and Safety**
Designed and tested in according to the structural mechanics and construction standards.
- Excellence Duration**
All the material selected have high quality anti-corrosion protection.
- Great Flexibility**
Tilt angle can be adjusted according to the actual criteria quality for the projects.
